

MK 6 BUTTON SHANK WRAPPING MACHINE

The practical semi automatic button shank wrapping machine for sample rooms or small production runs.

The MK 6 is our standard small button shank wrapping machine. It is designed primarily for sample rooms and small production.

The machine wraps the MMS TF thread around the button shank. This shank is then heat sealed to ensure permanent button security. The resulting shank is clean very neat.

- Semi automatic
- Simple to use by even unskilled operators
- Instant change of the wrap number.
- Conveniently mounted heating fork to enable the operator to bond the wrapped shank.
- Inbuilt control system ensures the bonding process cannot be forgotten.
- Optical and sonic indicators to ensure the optimum bonding time is achieved.
- Compact and portable.
- Perfectly suited to the small production environment.
- Proven technology ensures reliability.
- Made in England.
- Not suitable for shank buttons or buttons with long shanks.

Specifications

Electricity supply
100 - 240v 1 phase

Weight
3.6 kg

Dimensions
W16 x D32 x H31 cm

Shipping dims
W25 x D32 x H31 cm

Shipping weight
4.3 kg

Features

Long shanks or shank buttons are not possible. For wrapping these the MMS automatic machine is required.

Advantages of MMS button shank wrapping system

SECURE:

Elastomeric gripping force and the heat sealing secure the button and prevent button-loss.

TAIL-FREE:

The button shank has a clean finish and is tail-free.

BULGE-FREE:

The slim button shank prevents the button hole from bulging.

MMS TF button wrapping thread available in 60 colours
