

HIGH SPEED AUTOMATIC BUTTON SHANK WRAPPING MACHINE

The MK 11 is our world wide best selling automatic button wrapping machines which was designed in house and continues to be manufactured in our own UK factory.

- Fully automatic
- Simple to use by even unskilled operators
- Precise computer controlled regulation of wrapping process
- Integrated regulated 360 degree heat sealing of the wrapped shank ensures lifetime button security
- Designed to use the minimum amount of wrapping thread by reducing waste
- Refined high speed process ensures maximum output
- Perfectly suited to all production situations from the sample room to high volume factories
- Highest quality components and proven technology ensures reliability

Available in two versions

MK 11 – Universal machine that incorporated a button holding mechanism so that long shanks and shank buttons can be wrapped.

MK 11 S – Standard version of the machine which is perfect for most standard button shank wrapping applications. Lean design ensures that this is the ultimate standard wrapping machine

MK 11 mounted to work in tandem with an MMS BAT 16

MK 11 / MK 11S
