Touching textile

MPS-2300

Fully automatic programmable multifunctional curtain pleating machine with integrated Microflex curtain hook feeder.

- Advanced, versatile, compact sewing machine designed to execute all steps in the pleating process such as pleat calculation, machine setting, pleat folding, hook feeding, pleat stitching and pleat tacking.
- The machine is pre-programmed for the production of single and double pleats with embedded Microflex curtain hooks in the length of 55, 75 and 95 mm. A special version for the production of 127 mm (5") pleats is optionally available.
- The pleat depth is adjustable from 20 up to 50 mm; the pleat distance is adjustable from 65 up to 185 mm.
- An accurate low capacity line laser always guarantees equal pleat distances.
- The machine is very easy to operate by using the multilingual LCD touch screen.
- Thread catcher system ensures that the initial thread length is minimized.
- Needle cooling system for obtaining a sewing speed of 2700 stitches per minute for a production of up to 2200 butterfly pleats a day.

1. LCD touch screen

2. Thread wiper

3. Microflex curtain hook

Eisenkolb has developed into the market leader in the curtain processing industry. As a provider of total solutions, we offer you an unprecedented expertise and supporting service based on technically superior machines and materials. That is how Eisenkolb contributes to the optimization of the primary processes in the textile related industries. Customer-oriented, starting from feeling for textile.
